Agenda

- The results of Kath Schoen's discussions with OAR.
- The different statutory definitions of domestic violence and what we would like the consistent definition to be.
- We solicited anecdotes from folks in the community about struggles they have heard of or experienced with the conflicting jurisdictions of the courts. For example, which orders take precedence: domestic relations orders that permit contact for visitation regarding children or a mandatory protection order prohibiting any contact. We will be discussing these anecdotes and possible legislative fixes regarding jurisdiction.
